PROFESSIONAL SUMMARY

Versatile IT Web Developer and Systems Engineer with over 8 years of experience building scalable enterprise web applications and managing robust on-premise and cloud infrastructures. Proven expertise in full-stack development (Laravel, VueJS), server virtualization, and enterprise network security. Adept at leveraging technical solutions—including cutting-edge AI integrations like RAG and Local LLMs—to drive operational efficiency and maintain 100% system uptime across 20+ corporate subsidiaries.

PROFESSIONAL EXPERIENCE

Alcantara Group | Makati City, PH *IT Programmer, Systems Administration* | 2017 – Present

- **ERP & Infrastructure Management:** Administer enterprise systems (NetSuite Oracle Cloud, QNE) for 20+ subsidiaries, ensuring 100% system uptime. Spearheaded user management and configured complex charts of accounts, custom reports, and SuiteScript enhancements.
- **Enterprise Server Architecture:** Architected and maintained secure enterprise infrastructure across Windows and Ubuntu servers, optimizing web hosting, Active Directory, cron job automations, and virtual private servers (VPS).
- **Full-Stack Application Development:** Developed, deployed, and maintained critical full-stack web applications using Laravel, CodeIgniter, and modern frontend frameworks. Built mission-critical internal tools including an HRIS and Payroll, Land Title System, AI Document Management System, and POS.
- **Network Security & Cloud Administration:** Managed OPNsense, Kerio Control Firewalls and VPN access to ensure enterprise-grade security for remote connections. Administered Google Workspace and MS 365, overseeing user provisioning and access management. Adguard DNS.
- **Technical Event Production:** Directed and managed technical operations for large-scale corporate events, handling multi-camera setups, live broadcasting, and post-production video editing for HR and Legal training.

Fairetech Inc. | San Juan City, PH *Network and Auxiliary Specialist* | 2015 – 2017

- **Network Engineering:** Engineered and deployed enterprise-grade Pfsense firewalls, secure VPN access, and on-premise mail servers.
- **Infrastructure Optimization:** Designed and optimized office connectivity using Ubiquiti Wi-Fi APs, Layer 2/3 switches, and enterprise routers.
- **Security & Access Systems:** Led the comprehensive rollout of network-based CCTV systems, door access controls, and biometric attendance architectures.

- **Internal Tooling:** Built and maintained the internal Company Portal for streamlined communication and documentation.

JL Group of Companies | Pili, Cam. Sur, PH *IT Specialist* | 2014 – 2015

- **System Implementation:** Spearheaded the implementation and workflow integration of SAP Business One and QuickBooks.
- **Server Virtualization:** Modernized IT infrastructure by virtualizing business systems via Hyper-V and VMware, optimizing server resource allocation.
- **Hardware Integration:** Deployed and administered an automated Timekeeping System integrated with biometric hardware.
- **Web & File Management:** Designed and launched the corporate website and intranet portal while managing Windows Server and NAS storage systems for business-critical files.

INDEPENDENT PROJECTS & QUANTITATIVE ANALYSIS

Algorithmic Trading & Market Analysis | April 2021 – Present

- Developed algorithmic trading strategies and custom indicators using TradingView Pine Script.
- Conducted advanced liquidation data analysis and fundamental market research across Forex, Cryptocurrencies, Indices, and Commodities using MT4/MT5 platforms.

EDUCATION

- **Information Technology** | STI College, Naga City, Camarines Sur, PH

TECHNICAL SKILLS

- **Programming & Frameworks:** Laravel, CodeIgniter, VueJS, React, Node.js, WordPress, PHP, JavaScript (ES6+), HTML5, CSS3
- **AI & Emerging Tech:** Local LLMs, AI RAG Systems, Prompt Engineering
- **Databases & Architecture:** SQL, MySQL, PostgreSQL, MongoDB, REST APIs, JSON
- **Systems & Server Admin:** NetSuite, SAP, QNE, Windows Server, Active Directory, NAS
- **DevOps, Cloud & Hosting:** Git, AWS EC2 & S3, Google Cloud, Proxmox, HestiaCP, Virtualmin, CyberPanel, cPanel/WHM
- **Networking & Security:** OPNsense, Pfsense, Kerio, Tailscale VPN, Ubiquiti, CCTV/Biometrics
- **Creative & Productivity:** Adobe Photoshop, Premiere Pro, DaVinci Resolve, MS Office 365, Google Workspace
